**CAROLINA PRECISION PLASTICS OFFICIALLY OPENS CHINA FACILITY  
WITH METALIZING CAPABILITY**

Carolina Precision Plastics, LLC (“CPP”) of Asheboro, North Carolina and Fischer Tech, Ltd. of Singapore celebrated the official opening of their joint venture, CPP-Fischer, in Suzhou, China on July 24 with a ceremony and ribbon cutting in front of employees, government officials and customers.

CPP molds, assembles and decorates for various consumer products markets, including cosmetics, fragrance, lip balms, pens/markers, automotive and industrial. Fischer Tech is an automotive and consumer electronics injection molder, assembler and decorator with an established record of successful operations throughout Asia. CPP-Fischer will combine the best of both companies, employing CPP’s U.S. based operations, engineering and sales force and Fischer Tech’s manufacturing strength in China to offer its customers in the cosmetics, fragrance and consumer products markets a truly global solution.

“The trust, knowledge and investment in our people and technologies are what will make CPP-Fischer successful,” stated Fischer Tech CEO Peter Tan at the opening. “These characteristics are what will separate us from our competitors.”

“Understanding the need to serve customers globally is essential,” stated Brian Tauber, CEO of CPP. “We must offer engineering, manufacturing and superior customer service in all regions of the world. With our European alliance and CPP-Fischer, we can make it happen.”

In addition to injection molding, CPP-Fischer has full assembly, paint and metalizing capability (as well as hot stamping and pad printing) and is evaluating blow molding and silk screening, operations CPP recently added to its Greensboro, North Carolina facility. In addition to these internal capabilities, Fischer Tech’s extensive experience in other decorating technologies such as in-mold decorating, laser etching, and cosmetic molding technology (CMT) allow CPP-Fischer to offer customers the breadth of plastic decorating possibilities. Fischer Tech also has full tool construction capabilities, rounding out the complete range of services CPP-Fischer can offer in China.

Jeff Camiener, CPP Vice Chairman, noted at the opening ceremony, “CPP and Fischer Tech have created a world-class plastics molding, decorating and assembly facility in China to better serve its customers’ global packaging needs. Our objective is to always ensure customer satisfaction in delivery of our product quality, cost, timing and service.”
